Cloud Storage App

This file lives in the demo account you just opened.

What you can try here:

- Upload a file. Images are routed to Cloudinary, everything else to Cloudflare R2 or Supabase Storage.
- Watch the storage meter. A demo account stores 10 MB, and the database refuses an upload past it.
- Visit Plans. Stripe runs in test mode, so card 4242 4242 4242 4242 upgrades without charging you. The plan changes; a demo account keeps its 10 MB.

A demo account cannot make share links.

This account is yours alone. It is kept for up to a day, or for an hour while every demo place is taken.
